

Steve Savage
Vice President of Construction

Qualifications

Mr. Savage has over 25 years of experience in the construction industry with a major portion of the last twenty years in clean room, chemical and cGMP environments. He is experienced in all aspects of renovations and new construction for office, manufacturing and laboratory facilities.

At SPEC he is responsible for on-site field supervision, site safety, coordination of all trades, and day to day scheduling. Mr. Savage brings a great deal of experience of projects ranging from small capital projects up to a \$96 million, 300,000 sqft project for Nortel Networks. Steve leverages this experience base for SPEC's clients, which enables him to quickly resolve unexpected field conditions. Steve has been an integral part of the SPEC team serving clients such as Entegris, Thermo Fischer, AVANT Immunotherapeutics, Soluol Chemical, Waters Corporation, Bostik and DSM Coatings.

Experience

Steve's direct experience prior to joining SPEC included roles at Erland Construction running the Nortel Networks project for a \$96 million renovation of the Nortel campus in Billerica, MA. Steve originally joined Erland as an Assistant Superintendent, prior to being promoted to the Sr. Superintendent position.

Prior to joining Erland Steve worked on the Big Dig as operations manager for Walton System International, an environmental engineering and construction firm. Walton specialized in the design and construction of civil / environmental systems.

In addition, Steve was trained as a Journeyman with Local 723, Carpenters and Joiners.

Steve also teaches construction-related courses for the Massachusetts Associated Builders and Contractors, Inc.
